
Associate of Applied Science in Diagnostic Medical Sonography

PROGRAM GOALS:

The goal of the Diagnostic Medical Sonography program (General Concentration) is the thorough preparation of the student, through quality didactic, laboratory, and clinical instruction, in the theoretical knowledge, tasks, and responsibilities required of an entry-level general sonographer.

PROGRAM PHILOSOPHY:

The Diagnostic Medical Sonography program of Southwest University at El Paso is committed to excellence in education demonstrated by providing a comprehensive entry-level education program to students through quality didactic and clinical instruction. The program supports the vision, values, and mission of Southwest University at El Paso by striving to be the premier Diagnostic Medical Sonography training program in our community. In combination, the program components ensure the adequacy of a well-rounded program through classes in didactic theory, application and practice of skill sets in the laboratory environment, and integration of didactic theory and acquisition of performance objectives in the clinical setting.

PROGRAM OBJECTIVES:

Upon completion of this program, the student will be able to:

1. Obtain, review, and integrate pertinent patient history and supporting clinical data to facilitate optimum diagnostic results.
2. Perform appropriate ultrasound scanning procedures and record anatomic, pathologic, and/or physiologic data for interpretation by a physician.
3. Record, analyze, and process diagnostic data and other pertinent observations made during the procedure for presentation to the interpreting physician.
4. Exercise discretion and judgment in the performance of sonographic and/or other non-invasive diagnostic services.
5. Provide appropriate and compassionate patient care for patients undergoing ultrasound examination.
6. Demonstrate appropriate communication skills with patients and colleagues.
7. Act in a professional and ethical manner.
8. Provide patient education related to medical ultrasound and/or other non-invasive diagnostic ultrasound techniques, and promote principles of good health.

OCCUPATIONAL OBJECTIVES:

The successful graduate of the Diagnostic Medical Sonography at Southwest University at El Paso will have the knowledge and skills to obtain entry-level employment as a Diagnostic Medical Sonographer in:

- A Hospital or Medical Center
- A Medical Clinic
- A Radiology Imaging Center
- A Physician's Office
- Mobile Ultrasound Service
- Free Lance Sonographer
- Traveling Sonographer
- Commercial Ultrasound: Applications Specialist and Sales
- Research Sonography

Admissions requirements:

- All potential students must receive a school catalog prior to signing an enrollment agreement
- Student must attend entrance orientation
- A high school diploma or its equivalency is required for admission into the program
- Prospective students must complete a successful interview with an intake (admissions) counselor
- Prospective students must submit an AAS DMS Admissions Application
- Applicants must be at least 17 years of age (applicants under the age of 18 require written permission from a parent or legal guardian in order to enroll.)
- Applicants must take and pass an institutional HESI entrance exam with a minimum of 70%. Non-Refundable exam fee is \$45.00 dls
- Applicants must be a graduate of Southwest University AAS Allied Health Program. (Tuition and Program length for these programs are in addition to the cost for this program; please refer to the institutional catalog for program specific tuition costs).

General Criteria: Applicants for specialized admissions must satisfy minimum criteria in order to be eligible for consideration for ranking. The following is required for all students wishing to enroll the program:

- Must be a graduate of an SU AAS Allied Health Program or a SU BS program
- Must have earned a minimum SU cumulative GPA of 3.5, an attendance rate of 90% and no write ups are required.
- The following is required for all outside students wishing to enroll the program: Baccalaureate in Science and Minimum cumulative GPA of 3.0 (Transcript is required for academic review)

Students must complete admissions requirements prior to enrollment in specialized courses. There is a scheduled ranking date for this program. It is ultimately the student's responsibility to submit all required documentation to allow for normal processing.

Total Lab Hours:	370 Hrs
Total Externship Hours:	825 Hrs
Total Lecture Hours:	1100 Hrs
Total Program Hours:	2295 Hrs
Total Length of Time:	104 Wks
Total Credit Hours:	156.50 Credits

Definition of Academic Year: An academic year will consist of 30 instruction weeks and 36 quarter credit hours.

Full Time Status: Student's enrollment status will be considered full time if the student is enrolled in at least 7.5 credit hours in a six week period.

Program Delivery: Blended (*Residential and Online, please see marked classes*) The program content is offered through lecture, laboratory, and externship experience. (certain lecture and/or laboratory courses may be delivered online, those courses are identified as blended, below)

AAIP 101 ADVANCED ANATOMY FOR IMAGING PROFESSIONALS

This course is designed to establish a knowledge base in the systems of the human body. The course content describes and discusses in specific detail the various functions of biological systems within the human body. The course introduces concepts relating to tissue, cells and organ systems. Anatomy is heavily emphasized, and individual class sessions often concentrate on specific parts of the body. Beginning human physiology covers the mechanisms sustaining human life and addresses each system's specific function, health issues, pathologies, diagnostics and disease prevention.

Clock hours of lab: 20

Clock hours of classroom lecture: 40

Clock hours of individual and small group tutoring: provided to student on an as-needed basis

Pre-Requisite: N/A

Total Clock Hours: 60

Tuition: \$1,575.00

Length of time (1 hrs per day, 5 days per wk): 6 wks

ALG 110 ALGEBRA I

This course is designed to provide understanding of basic properties of real numbers and to use algebraic models to solve verbal problems with linear and quadratic equation, complex numbers, factoring and graphs. Emphasis is placed on manipulation of algebraic equations, problem solving and their correlation to general arithmetic.

Clock hours of lab: 0

Clock hours of classroom lecture: 30

Clock hours of individual and small group tutoring: provided to student on an as-needed basis

Pre-Requisite: N/A

AIP 101 ANATOMY FOR IMAGING PROFESSIONALS I

This course provides systemic and functional review of human gross anatomy and sectional anatomy in order for students to obtain the knowledge required in the diagnostic ultrasound medical field. Students will learn the physiology of different (organ) systems. The course will cover the following subject areas: Integumentary, Endocrine, Musculoskeletal and Nervous System.

Clock hours of lab: 10

Clock hours of classroom lecture: 20

Clock hours of individual and small group tutoring: provided to student on an as-needed basis

Pre-Requisite: N/A

Total Clock Hours: 30

Method of Delivery: Blended

Tuition: \$788.00

TOTAL = 2.5 Qtr Hr

AIP 102 ANATOMY FOR IMAGING PROFESSIONALS II

This course provides a systemic and functional review of human gross anatomy and sectional anatomy in order for students to expand the knowledge acquired in the Anatomy for Imaging Professionals I course. Students will learn the major gross— anatomical and systematic anatomy structures and physiology functions / interactions of the different (organ) systems. The course will also introduce students to basic diagnostic images of gross-anatomical and sectional anatomy structures, as well as basic physiology. This course will primarily focus on the sectional anatomy as it pertains to the Cardiovascular, Lymphatic, Respiratory, Digestive Reproductive and Urinary Systems.

Clock hours of lab: 10

Clock hours of classroom lecture: 20

Clock hours of individual and small group tutoring: provided to student on an as-needed basis

BIO 103D MICROORGANISMS AND DISEASE

Microorganisms & Disease covers principles of microbiology and the impact these organisms have on humans and on the environment. Topics include the various groups of microorganisms, their structure, physiology, genetics, microbial pathogenicity, infectious diseases, immunology, and selected practical applications. The course will additionally cover the proper application of the skills needed for microscopy,

aseptic technique, staining, culture methods, and identification of microorganisms.

Clock hours of lab: 0
