
Bachelors of Applied Science in Criminal Justice

The Bachelors of Applied Science in Criminal Justice program is intentionally designed as a professional, practice-oriented degree that prepares students for employment and advancement in law enforcement, courts, corrections, and public safety organizations. The curriculum emphasizes real-world application, professional standards, and workforce readiness rather than purely theoretical study, ensuring graduates are prepared to function effectively in modern criminal justice environments. The program equips students with the knowledge, skills, and competencies required for professional practice and career progression within the criminal justice field. Instruction focuses on ethical decision-making, legal compliance, professional communication, and leadership within the criminal justice system. Students gain a comprehensive understanding of law enforcement operations, court procedures, and correctional systems, with specific emphasis on Texas law and public safety practices. Throughout the program, students develop applied skills in critical thinking, data interpretation, report writing, courtroom and professional communication, leadership, and community engagement. The curriculum is structured to support working and aspiring criminal justice professionals by reinforcing practical problem-solving, situational awareness, and decision-making skills relevant to field operations and supervisory roles. Graduates of the program are prepared for employment in criminal justice and public safety settings, including law enforcement agencies, correctional facilities, courts, and related organizations, or for continued education in criminal justice or closely related disciplines.

Admissions requirements:

1. A high school diploma or its equivalency is required for admission into the program.
2. Successful interview with an intake (admissions) counselor.
3. Proof of citizenship
4. Completion of Online Course Orientation <https://southwestuniversity.edu/online-course-resources/>
 - a. This includes a review of the technology resources required for successful program completion needed to start the orientation
5. Applicants to the Bachelor of Science in Criminal Justice must have completed and received a recognized certification in a public service-related field prior to admission.
 - a. Acceptable certifications include, but are not limited to: Law Enforcement (e.g., EPPD or equivalent police academy certification), Firefighter, Emergency Medical Services (EMT/Paramedic), Corrections Officer, or other approved public safety or public service certifications.
 - b. Certifications must be issued by a recognized or accredited agency, and documentation must be submitted as part of the admissions process.

The program is offered through online lectures.

Program Length: (Clock Hours)

Total Lab Hours:	310 Hrs.
Total Lecture Hours:	1710 Hrs.
Total Program Hours:	2020 Hrs.
Total Length of Time:	144 Wks.
Total Credit Hours:	186.50

Credits

Definition of Academic Year: An academic year will consist of 30 instructional weeks and 36 quarter credit hours.

Distance Authorization: This program will be part of the institution's agreement with NCSARA; the degree will be eligible in all states within the NCSARA pact; this excludes California.

Full Time Status: Student's enrollment status will be considered full time if the student is enrolled in at least 7.5 credits hours in a six-week period.

Program Delivery: Full Distance

ALG 110 ALGEBRA I

This course is designed to provide understanding of basic properties of real numbers and to use algebraic models to solve verbal problems with linear and quadratic equation, complex numbers, factoring and graphs. Emphasis is placed on manipulation of algebraic equations, problem solving and their correlation to general arithmetic.

Clock hours of lab: 0

Clock hours of classroom lecture: 30

Clock hours of individual and small group tutoring: provided to student on an as-needed basis.

AP 102 ANATOMY & PHYSIOLOGY II

This course provides a systemic and functional review of human gross anatomy and systemic anatomy in order for students to expand the knowledge acquired in the Anatomy & Physiology I course. Students will learn the major gross-anatomical and systematic anatomy structures and physiology, functions/interactions of the different (organ) systems, as well as the related terminology. The course will also introduce students to basic diagnostic images of gross-anatomical and systematic anatomy structures, as well as basic physiology, common diseases and treatments. This course will primarily focus on the clinical anatomy as it pertains to the Special Senses, Endocrine, Cardiovascular, Lymphatic, Respiratory, Digestive Reproductive and Urinary Systems.
